Subject: Re: Question on a different FOIA dataset

Ah. That's not what the reporter told us. I guess he didn't know what he was asking for.

John

>> John,
>>
>> Due to differences in the ways the data is entered and stored in our database for EPA run vs manufacturer run in-use testing, if you filter on 'EPA In-Use Surveillance Testing (EPA Only)' in the EMISSION_PGM_NAME (column E) of the spreadsheet, you will get the tests run as part of the EPA in-use surveillance program (run at EPA) on the "from Verify" tab. All of the vehicles on the "from FileMaker" tab are EPA run testing. The reason for the 2 tabs is EPA data system changes over time.
>>

>> Byron et al,
>>
>> Timothy Gardner of Reuters sent a FOIA request to EPA last fall, asking for any documents on in-use testing. As part of this, EPA sent him a 2835 row spreadsheet with all test data for 2005 to 2014 diesel vehicles. This is attached.
>>
>> Tim asked ICCT to take a look at this. One of the first things I noticed is that there was a field "MFR_TEST_LAB_NM" (column BE). Of the 2835 rows, only 45 are listed as being tested at EPA's lab. And all of these were for 3 different BMW engine families. There is no EPA test data listed for any VW diesel vehicle.
>>
>> I have a hard time believing that EPA did not confirm the first diesel with a LNT. Are the lab locations in column BE accurate? Is there some coding that I am not interpreting properly?
